Grants and Program Offices offer review of applications to the Swedish Research Council for Starting grant and Project grant 2021 for researcher with an academic age of 2-7 years after PhD

Grants and Program Offices (GPO) at Linköping university offer review of applications to the Swedish Research Council (Vetenskapsrådet) for Starting grant and Project grant 2021 for researchers with an academic age of 2-7 years after PhD.

The researcher signs up to participate at a webinar and a review of their application.

The registration is made to GPO through a registration form (see below) at the latest the 1st of December 2020. Since we do not know how many people will be interested, or how the distribution between subject areas will be, a main and a reserve list of the applicants will be created on a first-come-first-serve basis. When the deadline has passed, all registered researchers will receive information about whether they are on the main or the reserve list. If time allows applications from the reserve list will also be reviewed. After the review, the researcher will get written comments, and it is up to themselves to decide what to accept.

The deadline to send in a complete application generated in Prisma to GPO will be 4-6 weeks before the official deadline for that specific call to the Swedish Research Council. More information regarding this review including deadlines for each call, checklists and templates will be sent to all registered researchers and will be available at GPO’s webpage.

Each application will be read by two research coordinators with a research background, and with experience of reviewing grant applications. We also suggest that the researcher asks an experienced colleague within the field for a research area specific review.

➢ To registration for review of the application (deadline 1st of December)

Webinars
The webinars are open for all interested, even those who have not signed up for the review. We recommend that the researcher signs up for the webinar that addresses the call for which one plans to apply for. The times for the webinars are 10.00-12.00 on the following dates:

• Humanities and Social Sciences (HS) and Educational Sciences (UV) Project grant: 15th of December
• Medicine and Health (MH) Starting grant: 7th of December
• Medicine and Health (MH) Project grant: 14th of December
• Natural and Engineering Sciences (NT) Starting grant: 8th of December
• Natural and Engineering Sciences (NT) Project grant: 10th of December

➢ To registration for the webinars

Please contact gpo@liu.se if you have any questions.

Welcome to register!
