Bernt Järmark Foundation for Scientific Research

Scholarships

The Foundation's purpose is to support scientific research in the fields of automatic control, especially differential dynamic programming (DDP) including the convergence control parameter (CCP), game theory, flight mechanics and applied mathematics in the broadest sense, for example in human-machine complex of problems, economics or biomedical engineering with mathematical orientation.

Eligible to apply are doctoral students and researchers who are connected to the Foundation's purpose and especially younger researchers and preferably women. This year we will award scholarships between 50,000 and 150,000 SEK.

Instructions for application:

The application must be sent no later than 30 September, 2018, marked with Dnr LiU-2018-01322 to Registrar at Linköping University, registrar@liu.se with a copy to Lisa Blomgren, secretary in the Foundation board at the Faculty of Science and Engineering, lisa.blomgren@liu.se. Lisa Blomgren will also answer questions.

The application must contain:

• A brief description of the project or purpose for the application, max ½ page
• Applied amount and budget for the project
• CV of max 2 pages, including a list of the 10 most important publications
