Teaching a mathematics-based course?

Linköping University is currently piloting a digital courseware platform that can be used to create, maintain, and deploy digital course assets for mathematics-based disciplines.

Heard of Möbius?

Möbius Courseware is an online platform that:

- Engages students in interactive learning interspersed with visualisations to anchor concepts.
- Provides automatic grading for immediate feedback, adaptive course progression.
- Yields demonstrated, substantially improved student outcomes.

...and much more!

Join colleagues for a live demo with 2 expert users!

Monday 5th November 2018

DigitalEd will be on campus with educators from University of Birmingham (UK) and TU Wien (Austria) to show you how you can integrate these tools in your classes.

Time: 13:00-15:00
Location: T1 i C-huset, Campus Valla in Linköping
No registration required.
