

HEALTHCARE SCIENCE • PUBLIC HEALTH SCIENCE • SOCIAL SCIENCE
COMMUNICATION SCIENCE AND BEHAVIORAL SCIENCE

Are there cancer-related issues in your research?

Researchers at LiU: Welcome to a Webinar 26 March with Klas Kärre, The Swedish Cancer Society.

Klas Kärre, Chairman of the Research Committee, will talk about the Swedish Cancer Society's grant and funding round, which opens at the end of March and closes on 23 April.

The Swedish Cancer Society fund high quality research and welcome applications from researchers in many different fields, such as natural science, medicine, health-care, technology, pharmaceuticals, public health, social science, behavioral and communication science.

At the end of March, we are opening our call for projects, increased support, research months for health care employed staff and planning groups. In particular, we would like to receive more applications and innovative ideas within the following fields:

- **Healthcare** (e.g. quality of life, rehabilitation, palliative care)
- **Public health science** (e.g. epidemiology, prevention, lifestyle factors)
- **Social sciences** (e.g. health economics, sociology)
- **Communication and behavioral science** (e.g. implementation of prevention-related knowledge)

When: 26 March, 11 am - 12 noon
Opportunity to ask questions.

A webinar in cooperation with LiU Grants Office.

The background to this is that more and more people are suffering from cancer. Every year more than 60,000 people are diagnosed with cancer in Sweden. It is estimated that in 25 years' time, the annual number of diagnoses will have risen to more than 100,000.

The Swedish Cancer Society finances high quality research supporting all aspects of cancer. Maybe your particular research project can help us defeat cancer? Apply for a research grant from us by April 23 at the latest. Applications will be accepted from the end of March.
